Floating Lab

Alwazzan, Ali

My project is called " Floating Lab " which includes a complete lab. This lab can measure the ph of the sample of the water and the temperature of the sample and the oxygen desolved in the water , then the oxygen around this sample . then we take this measurements to study the pollution in the water of the arabian gulf ,then we take this sample of the water we measure also the heavy metal in this sample by using qualitative analysis . After that we take the sample to measure the amount of this sample by using colourmetry unit , it depends on the qualitative analysis
