Robot of Upbringing Genius Kids for the Future

AL HABSI, NABIL
Alnasseri, Alwaleed
Alhinai, Adam

This robot intends to solve mental disabilities, physical weakness and poor thinking among children. It also tries to find solutions to these problems which face children. Among these solutions are improving thinking abilities, solving nutrition problems, increasing physical activities and reinforcing psychological health. It also aims at implanting good behaviors among children such as following instructions, throwing waste in waste baskets and asking for help whenever needed.
