Meet Protium Protium is a high-level web-development platform that encourages rapid development and clean, pragmatic design. With Protium you can take Web applications from concept to launch in a matter of hours. It takes care of much of the hassle of Web development, so you can focus on writing your project without needing to reinvent the wheel. Core idea Main Protium’s strength is modules. Every project built with Protium contains modules like news module, auth module, etc. Because every module works with other modules only through Protium. That provides extreme flexibility. Protium supports JVM languages: Java, Groovy, Kotlin and JRuby. Itself was written on Java. Ridiculously fast Protium was designed to help developers take applications from concept to completion as quickly as possible. Increasing speed Reuse already written modules like user authentication, content administration, site maps, Database connectors, CSRF, Template engine, and many more.
